A Inside: children to root
v_0
$\alpha(v_0) = \hat{Z}$
ω_0
v
x
ω_r
u_1
u_2
$\omega_r\alpha(u_1)\alpha(u_2) \rightarrow \alpha(v)$
B Outside: root to children
v_0
$\beta(v_0) = 1$
ω_0
v
x
ω_r
Use sibling inside weight
u_1
u_2
$\beta(v)\omega_r\alpha(u_2) \rightarrow \beta(u_1)$
