Probability
40–160 enlarged
PseudoLoop peak: 0.840 at base 123
Position (nt)
C
4-nt window accessibility, by loop type
All four bases unpaired together; black line = total
Start of 4-nt window (nt)
D
Reference stems in samples
All pairs present; 1,000 samples
Outer (6)
81.0%
Inner (3)
23.7%
Both (9)
23.5%
Samples (%)
MFE: outer 6/6, inner 3/3 pairs
MEA, γ = 1: outer 6/6, inner 1/3 pairs
